WHAT CAUSES DISEASE?

A WHOLISTIC OVERVIEW
WITH A FOCUS ON THE HISTORY OF AIDS
AND THE USE OF OXYGEN THERAPIES

By Ed McCabe

PRESENTED MARCH 25, 1994 AT THE
INTERNATIONAL BIO-OXIDATIVE MEDICINE FOUNDATION
1994 CONFERENCE

SOURCES

This paper is not the results of a double blind study. It can best be described as a collective of real world popular wisdom and postulates meant to encourage sincere researchers to open their minds to many possibilities that are already being accepted as probabilities by those pioneers who are operating within mainstream medicine, and those operating as healers out on the fringes of orthodoxy. Throughout history, some of today's fringe always becomes tomorrow's mainstream, so no treatment methods should ever be automatically discarded without careful scrutiny. The pattern of "closing of the ranks" of medicine to "outsiders", in other words, closing of the minds is all too often commonplace today.

There are many clinics inside and outside the united States of America that have, and continue to treat thousands of people that never have their methods show up on any official registry. Yet these clinics - taken as a group - have collected a huge body of practical wisdom from witnessing the immediate positive results of methods unheard of by the majority. The owners of these clinics are either U.S.A. M.D.'s engaging in un-"orthodox" methods, or Naturopaths, or Caribbeans or Mexicans or Canadians or Europeans or Pacific islanders who don't publish papers in the AMA Journal.

For years I have reported upon the long list of diseases ozone has positively affected, from AIDS to cancer and even the common cold. In this paper I depart from persuing that direction and reflect upon the history and future of disease using AIDS as an example. I have summarized what I consider to be some of the more important knowledge the unorthodox and the orthodox have collectively amassed concerning disease in general, and especially AIDS. I have spent 7 years conducting thousands of interviews with those working in the healing arts, including everyone from patients self treating to fully credentialed M.D's who are forced by political pressure to hide their lights under a basket of secrecy. This paper is an attempt to quickly convey a few of the more important ideas to you. If any of the paradigms advanced herein were previously unnoticed by you, perhaps you could give a look in their direction. In this way I will accomplish my task of helping you in your work of helping the sick achieve balance.

PREFACE ON HIV/AIDS/TESTING

Although many who have been pronounced to have AIDS test positive for HIV viruses, HIV has never been positively proven by itself to cause AIDS, it has only been announced as such in the media. My anecdotal research shows AIDS, as of this publication date, comes as a "packett" or symbiotic grouping of several viruses. I will explain this concept in more detail later.

Being HIV positive doesn't necessarily mean you have AIDS, but that your bodily fluids are low on oxygen and that you do have an immune system under attack by many factors. Hoping for a sero conversion to HIV negative should not have the weight it presently possesses when the particular viral nucleotides that you are testing for (PCR test) have never been proven to be the single cause of the disease. Antibody tests are also therefore suspect. Testing that yields positive results for perhaps common HIV viruses or HIV antibody presences simply reveals an indication as to a deficiency in how clean your bodily fluids are.

I have seen HIV positive people undergo an intensive course of ozone therapy, for example. They end up PCR negative. We brought two to the National Institute of Health. During their ozone treatment course all their secondary diseases disappeared. I propose that what the absence of HIV nucleotides indicated in these cases was that the ozone had so thoroughly cleaned and sterilized their red and white blood systems that no matter what virus or group of viruses and bacteria caused the AIDS complex, ozone therapy was able to clean them all out, of course taking the causative factors right along with it. If your blood and lymph are very clean you might not have any detectable viruses in you, HIV included, and your antibody production might be so low as to be undetectable by standard testing since the body, sensing its lack of need for antibodies will only make a few. The true count will be hidden below the "noise" or background of the readings.

HIV AND SYPHILIS

Many are proposing that the basis of AIDS is syphilis with various co-factors, which the medical profession has lost almost all knowledge of how to diagnose correctly anymore. Before the Second World War, doctors spent years learning the intricacies of the diagnosis of Syphilis. When the war came, they needed lots of doctors quickly, so they rushed people through medical training by cutting out years of diagnosis training - which focused on syphilis and all its variations - and concentrated instead on drugs as general treatments. So now most doctors don't know all the intricacies of syphilis when they see it, and tend to simply use toxic drug treatments on symptoms instead.

First stage syphilis

Presents as a Herpes type disease with blisters or sores around the genitals.

Second stage syphilis

Creates sores on the body, now called Kaposi's sarcoma.

Third stage syphilis

Same as third stage AIDS which affects the brain and causes dementia.

Fourth stage syphilis

Affects all organs and life is lost.

THE DISEASES OF HUMANITY

A traditional viewpoint shows us the four diseases of humanity, and all other diseases are various stages of these under different names.

DISEASE

RELATES TO

Syphilis	Immune Deficiency Syndrome (IDS), Second stage syphilis is AIDS
Cancer	Genetic outgrowth of ancestral syphilis
Gonorrhea	Imbalance due to inability to handle moral sexual understanding
Diabetes	Hypoglycemia, Blood Poisoning, Yeast Infections Possibly from alcohol overuse by self or ancestors

Leading intuitive body energy researchers postulate that there are 9 major energy pathways or energy "miasms" - similar to genetic miasms yet existing in a higher energy gradient - under which all possible forms of disease in humanity can be classified:

HUMAN MASTER MIASM ENERGY FREQUENCIES (using non linear Qballhic scale)

Psychotic	1069	Radiation	1081
Gaseous Effluent	1071	Psora	1090
Syphilitic	1072	Cancer	1091
Stellar	1073	Petrochemical	1097
Heavy Metal	1075		

HOW HUMANITY GETS DISEASE

Here's how it works. You come into this lifetime a combination of everything your ancestors experienced coded into your body genes, and everything YOU experienced in previous incarnations coded into your personal Spiritual Essence. You could have a genetic disposition or weakness for certain diseases because your grandfather or mother experienced alcoholism, or back 500 years ago some relative had syphilis. The memories of these diseases is still coded into your DNA as a possibility. Combined with this genetic weakness is the imbalanced (negative) energy pathways you created and imprinted upon your own spirit by your personal actions and reactions to life experiences throughout your many lifetimes here in the physical worlds.

If you have the seeds or memories or pre-established pathways of immune disorders present in both the physical and non-physical, and you start stressing yourself in this life through eating non healthy food, indulging in hate, anger, depression, overwork, drugs (legal and illegal), or in any other way you can dream up to hurt yourself, and you swap fluids by kissing, etc. or coming into close contact with someone full of viruses and bacteria and become multi-infected, you will be a prime candidate for manifestation of many immune disorders physically yourself. The outside influences, the bacteria and viruses you meet in the environment are fueled to colony stage within you by the immune system and cellular oxygen level depressing negative lifestyles and emotions you indulge in. In a sense they easily walk right through the inner pre-existing open doors - your DNA and energy miasms. Call this AIDS or the Martian Flu, the label really doesn't matter.

SYPHILIS THE FATHER OF AIDS

For us now, Syphilis is the grand daddy of them all. Although existing in ancient Rome and before, basically its modern form came from malnourished, scurvy laden European sailors co-mingling their Herpes sores with American Indians who had their own native bacteria and related inner miasmatic energies. These new bacterial/viral genetic combinations of immune weakening energies and microbes were transferred back to the sailors, and upon returning home to Europe the sailors were treated with poisonous mercury. This was a common medical practice at the time, much like today's all pervasive pharmaceutical drug fad. Mercury is called "quicksilver," and doctors using it were called "quacks" - hence the origin of the term. The mercury poisoning's immune weakening forced even deeper mutations to be automatically generated within the sailor bodies creating new mutations of other communicable immune disorders, and the sick and now also mercury poisoned sailors spread the resulting new diseases throughout the world during their travels.

Shakespeare called it (syphilis) "The Pox." In the 50's AIDS was called IDS, Immune Deficiency Disease Syndrome. Then it became "Slim's disease" in Haiti and Africa, or GRID Gay Related Immune Deficiency Disease, because (According to Dr. Robert Strecker) it was targeted for introduction into the gay community by people who thought the gays were gaining too much political power. It was renamed, and described as threatening to the population at large so that the CDC, under President Reagan, would not have its budget and manpower cut. Now we call it Acquired Immune Deficiency Syndrome, AIDS.

FUTURE AIDS POLITICS

As the medical machine grows, so will its appetite, and now we have officials announcing HIV1 (San Francisco), HIV2 (Haiti), HIV3 (Touching), HIV4 (Airborne; coughing, sneezing, breathing, and Saliva), and perhaps official HIV5, HIV6 and 7 (Odors?), and beyond etc., all requiring of course more funding for the medical machine. Possibly to the point that everyone will be conditioned to go to their doctors to test continually, and be forced to get booster shots constantly, so that the opportunity for injecting politically motivated biological agents into the population is wide open. Think about forced vaccinations of children who must of course, be "tracked" throughout life, and you have a way to get a political dossier (call it a national health file) on everybody.

Perhaps you think government is benign, and would never hurt us? During the 1992 Desert Storm conflict, physicians were forced to inject (untested on humans) vaccines into our boys going to war (author Lindsay Williams). This was a clear violation of International law, and when one mother/soldier/physician refused to inject anybody, and stated it was illegal, she was tried by the military almost overnight and locked away before word could get out. Now we have all these soldiers coming down with "strange, unknown" illnesses. Or, how about when a few years ago (this was just on national TV - the "60 Minutes" program) the Navy sprayed viruses into the wind in the Bay Area of San Francisco to "see what would happen?" Of course, none of those who got sick had given their permission for this criminal invasion of their bodies by their own "kind and fatherly" government.

WHAT IS AIDS?

AIDS is not a disease in itself, but a varying symbiotic "package" of diverse and dangerous immune deficiency diseases that have been around for centuries. The HIV virus in Roman times was called "Trithium Trithicus". Not the cause, but a co-factor in AIDS. As our population's collective immune system continues to weaken due to the increasing overloading of industrial and personal lifestyle choice toxicity, more and more are falling prey to diseases that never would have bothered them before.

As of the date of this paper, (March 1994) the researchers I am in contact with who are using various advanced energy diagnosis and testing methods are finding that "HIV positive" people seem to usually be multiply infected with at least one, but often 3, or 5, or more instances of up to ten separate mutated forms of HIV. To give you an idea of how fast HIV is mutating within the bodies of the general population, the number of mutated HIV energy forms two years ago was only 5. If this trend continues, a doubling every two years, that means by 1998 there will be 40 distinct HIV mutations infecting the population at large. When people start coming down with 10 or 20 HIV infections at a time, the stress on the immune system will be enormous.

For the present time, these multiple form HIV infections seem to always occur "packaged" in combination with 5 or more other infectious forms out of a list of 21, the most often found being coxsackie B5, victoria A, Epstein Barr, and candida. You don't see candida announced as the cause of AIDS, yet every single person who dies of AIDS has candida. We find that most viruses in our body come "bundled" with several bacteria in a symbiotic relationship. The presence of these groupings are the presence of diseases. The extremely rapid rise of pollutants in our food, air, and water combined with the dropping of available oxygen levels in the same, has caused our bodies to become so weakened and "dirty" that our people are getting these immune disorders by the score.

WHAT DO PEOPLE EXPIRE FROM?

What kills people is stress, which could also be described as physical, emotional, mental, and spiritual imbalances. The prime physical stress is pollution collecting in their bodies, especially from the recreational drug usage (including cigarettes and alcohol) and medical synthetic drug usage causing mass destruction (sacrifice) of the body's white blood cells trying to attack foreign invading substances to the point that the body can't catch up with its defensive cell manufacturing. The collecting pollution lowers the cellular oxygen level, which damages cell respiratory mechanisms, and the cells aberrate into cancers or stop working or become centers of infection. In time, the white blood cells are all used up, and the body fluids are overrun with disease microorganisms, there are no defenses left, and the patient suffers and dies.

Chemotherapy (AZT) would kill 50% of any healthy people you give a full course to. It uses up white blood cells. Why give it to people with weak immune systems? Other substances destroy the lymphocytes as well. We had an HIV+ doctor in an ozone clinic drinking alcohol at meals and secretly smoking pot and doing "poppers" (Amyl Nitrate) after hours and complaining ozone didn't work on him! It sure didn't! These drugs deplete the immune system very quickly destroying the T cells and white blood cells.

Note: Whenever a reference to someone being HIV positive is given, it indicates mass pollution of his body fluids, and since the labs just don't test for the other viruses, bacteria and fungi like they do for HIV, saying someone is HIV positive is one of the few general conversational indicators we have of the state of someone's body fluid cleanliness. You can also have mass fluid pollution and yeast overgrowth, and expire from it, and just not happen to have a particular virus called HIV, yet they will still say you died of "AIDS." The original definition of AIDS included too few diseases to get the mortality numbers up fast enough to require big funding, so the definition has been expanded several times. Now the funding and power of the vested interests is expanding exponentially.

The prime emotional/mental stress is fear you will get the disease, fear that it is always fatal, and fear there is no cure. These beliefs enter your subconscious, and your subconscious programming determines your future. These negative patternings are reinforced daily through the constant barrage of "news." Most people don't know that the media outlets are all owned by the same affiliated persons who just happen to own the drug and disease testing companies. I refer readers to the excellent documented work of Eustace Mullins (Staunton, VA) for references.

The prime spiritual imbalance we experience comes when the searchlight of our attention is so turned away from our "inner" reality, our omniscient connection to The Ultimate Creator, that we restrict the inflow of subtle spiritual energies necessary for our survival in harmony. One of the best ways to rivet our attention strictly to the outer circumstances of life is to have pain and disease. One quickly sees how this process feeds upon itself in a downward evolutionary spiral.

WHAT IS THE ANSWER TO DISEASE?

The only answer to the dilemma of how do we get rid of the pollution and throw out the diseases is to stop the ingestion of toxic air, water, food, & drugs, and to give the body lots of something non-toxic and natural - something as a way to slowly and completely clean up all the bodily fluids - the 66% water which we are. See my paper "Mechanics of O₃ in Medicine" delivered in 1993 at IBOM. That natural substance to which I refer is Nature's energetic singlet oxygen. Singlet oxygen is what all oxygen therapies - like ozone/oxygen and other oxygen therapies in use for over 100 years - end up delivering to the body. Nature's singlet oxygen, once applied to the body correctly and for a long enough period, is the only substance that will rid one of viruses, bacteria, yeast, toxins, pollution, drug residue, etc., and still be welcomed by the healthy cells in the body.

The emotional/mental imbalances can be worked out through professional guidance and /or

self-assessment and rational decision making coupled with disciplined action. This is best achieved with professional guidance. I know of a licensed clinical psychologist in New York City (Dr. E. Davis) who is one of our country's leading specialists in the practice of helping the psychology of those afflicted with AIDS, and willing to give guidance to professionals.

The spiritual imbalances are best addressed by connecting with The Creator dwelling within us all, seeking the advice of experts, and embarking upon a daily program encompassing the elements of prayer, thankfulness, silence, meditation, and/or contemplation upon the happy goodness of the Source of all life.

CONCLUSION

There is a wealth of information to be gained through the study of unorthodoxy. People have been able to clean themselves out so thoroughly that they eliminate all disease causing microorganisms and tests verify it. Through time and politics, mutations of syphilis are now being called "AIDS". Humanity has 9 basic disease patterns. Disease results from collected and stored inner energy imbalances setting up conditions wherein dietary indiscretions, stress and coming into contact with foreign disease allows the proliferation of harmful microorganisms. Political situations are impeding solutions. AIDS or HIV positivity is proving to be a symbiotic package of multiple infections. People expire from immune exhaustion. The only therapies to address all the factors involved in physical illness are the oxygen therapies. The various oxygen therapies have been used internationally, safely, and successfully for over 100 years, and should be immediately researched and rapidly adopted by all caring physicians who put their patients' well being ahead of dogma. Best results are obtained by coupling the oxygen therapies with correct diet, detoxification, and a wholistic approach to balancing ALL that we are composed of.

This work is a small part of a larger text found in Ed McCabe's upcoming new oxygen/ozone therapies book. His first work, the self published best seller "Oxygen Therapies: A New Way Of Approaching Disease" has sold over 90,000 copies by word of mouth. Books and audio/video tapes of proof and testimonials are available from
